

What is Service Call?

ServiceCall is a system designed to make it easier for you to use petrol stations, shops and services. You simply aim a small infrared transmitter to activate one of the thousands of ServiceCall receivers in the windows of petrol stations, banks, shops etc.

The receiver then beeps for about 5 seconds, alerting staff inside that you require service. They then come out to serve you. To make it easy for staff to identify you, we supply a ServiceCall sticker for your vehicle. The receiver flashes to show that your request has been received.

No more sounding horns, flashing lights or having to ask passers-by for help - just look for ServiceCall!

How do I get ServiceCall installed locally?

When you order your ServiceCall receiver, we will send you 10 leaflets for you to hand to local outlets where you would like to see ServiceCall installed. Any of these outlets that order a receiver will automatically be added to our national list, so helping other disabled people.

A few suggestions for your receivers - Petrol station, bank, building society, post office, chemist, shops, superstore, fast food outlets, job centre, Shopmobility, library, police station, doctors, cinema, work place.

Where reasonable, service providers are required to provide additional assistance to disabled people to enable them to use their service.

Disabled Discrimination Act. For more information, call 08457 622633

And of course, ServiceCall is available at thousands of places already and the number is growing daily. You can already use your transmitter at all motorway service areas and all Safeway and Sainburys filling stations,

What does it cost

Just [£14.95](#) (including P+P), a ServiceCall sticker for your car and a list of all receivers already installed in your area.

Or use the following

Standard contact details..
